

Typo Effect Analysis

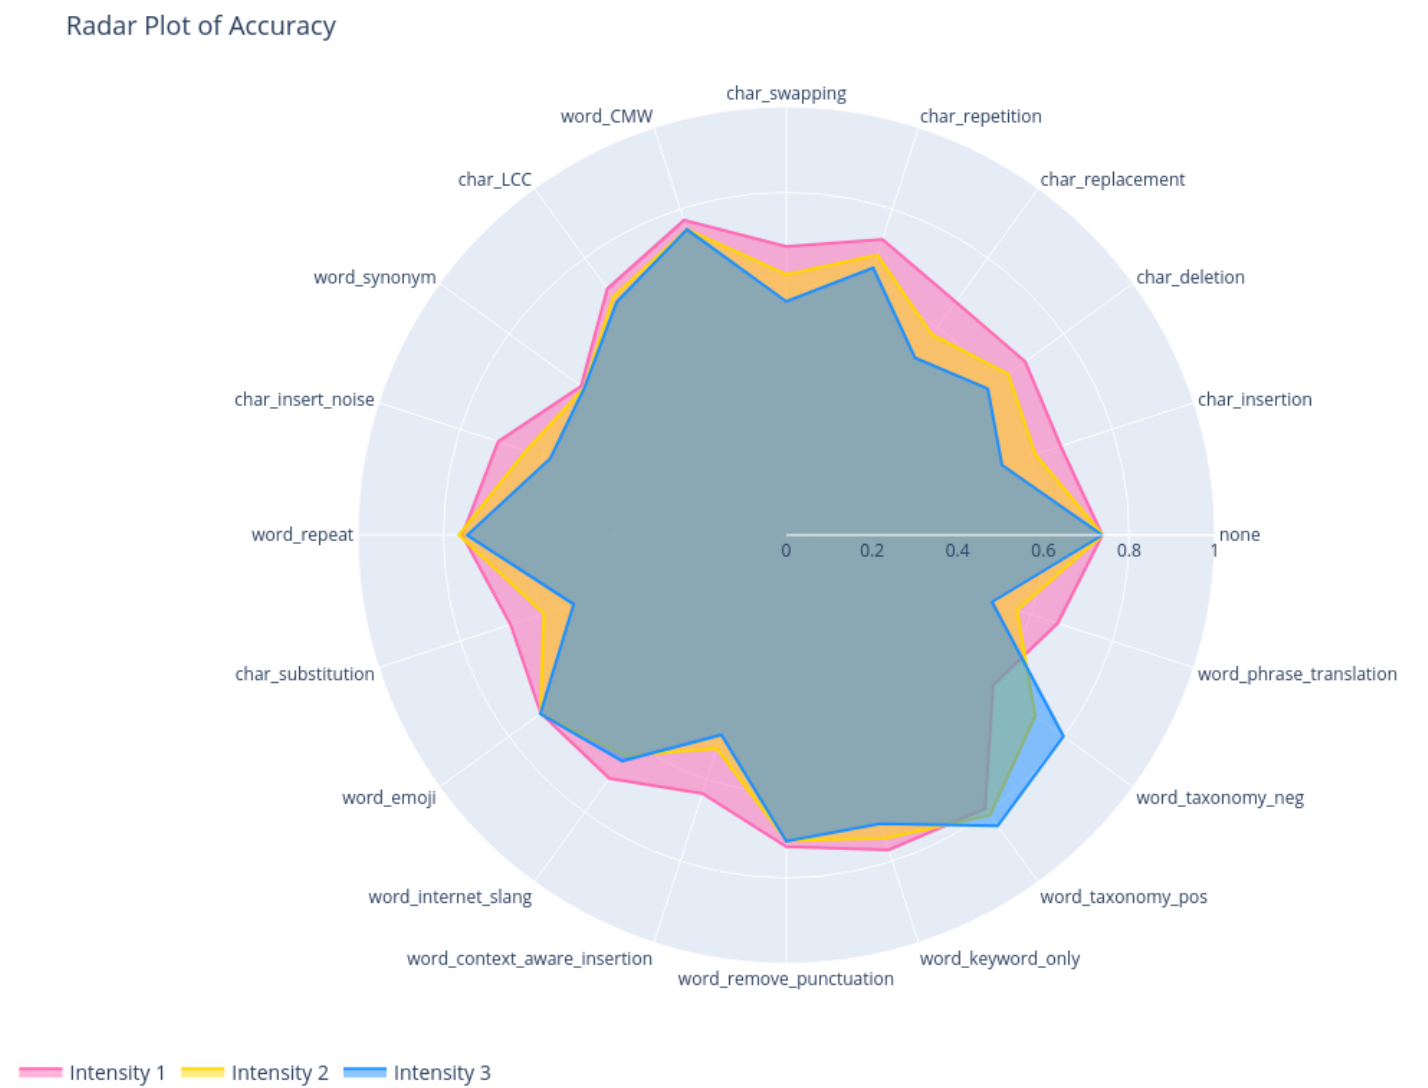

Model: Llama-3-8B

Strategy: Direct Completion

Max New Tokens: 25

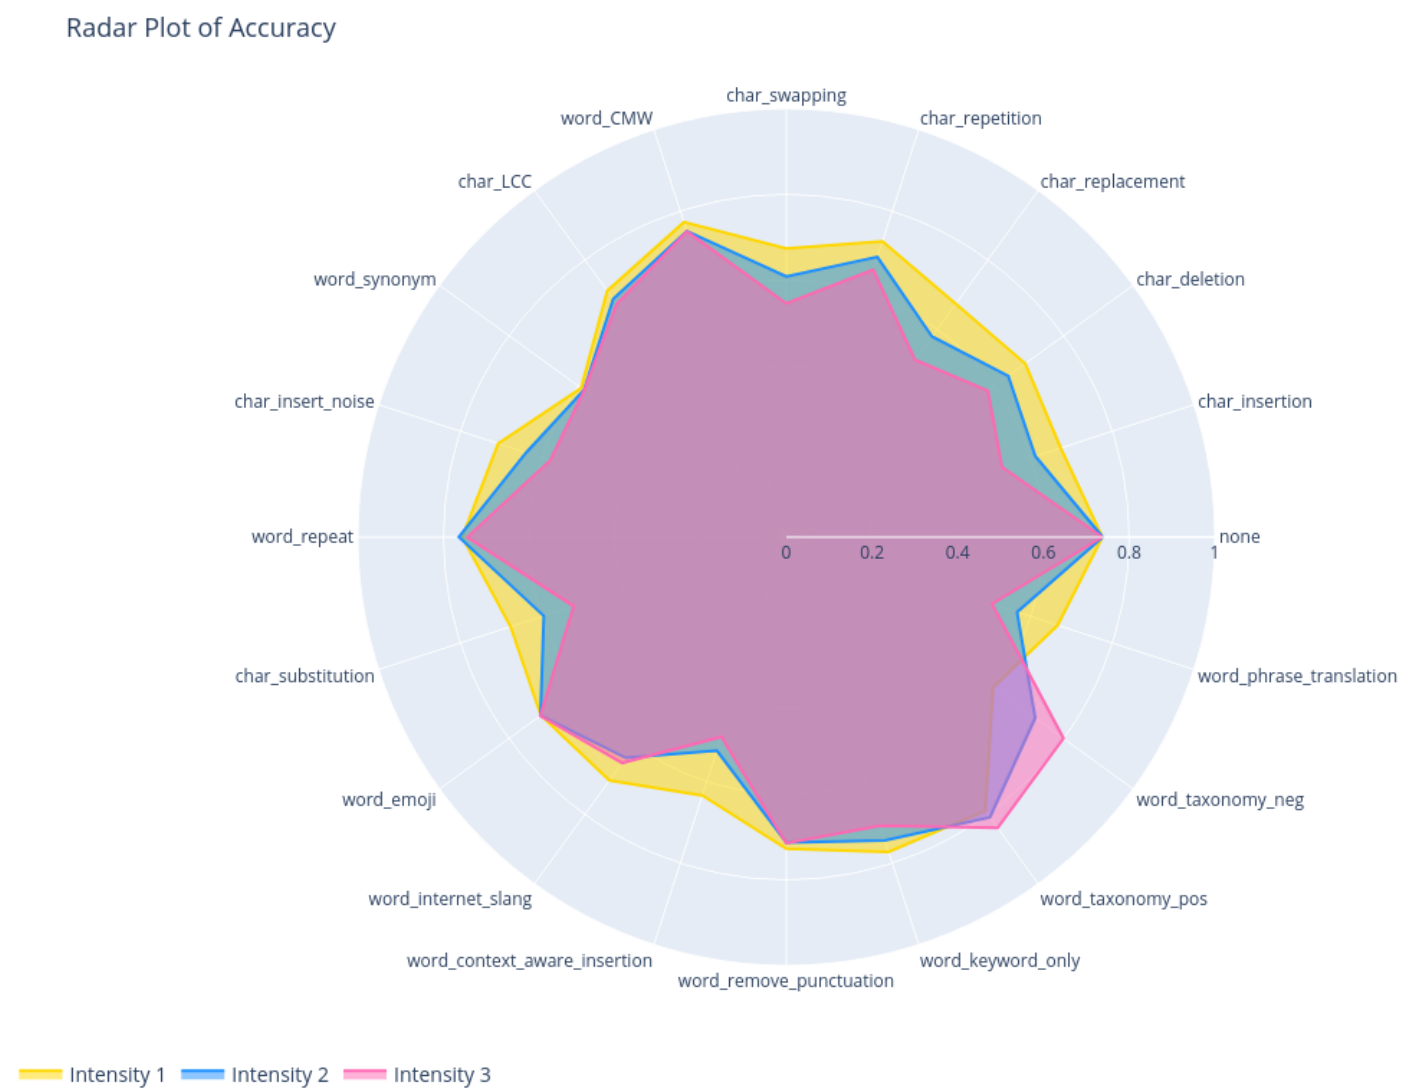

Temperature: 0.1

Radar Plot 1 of Accuracy

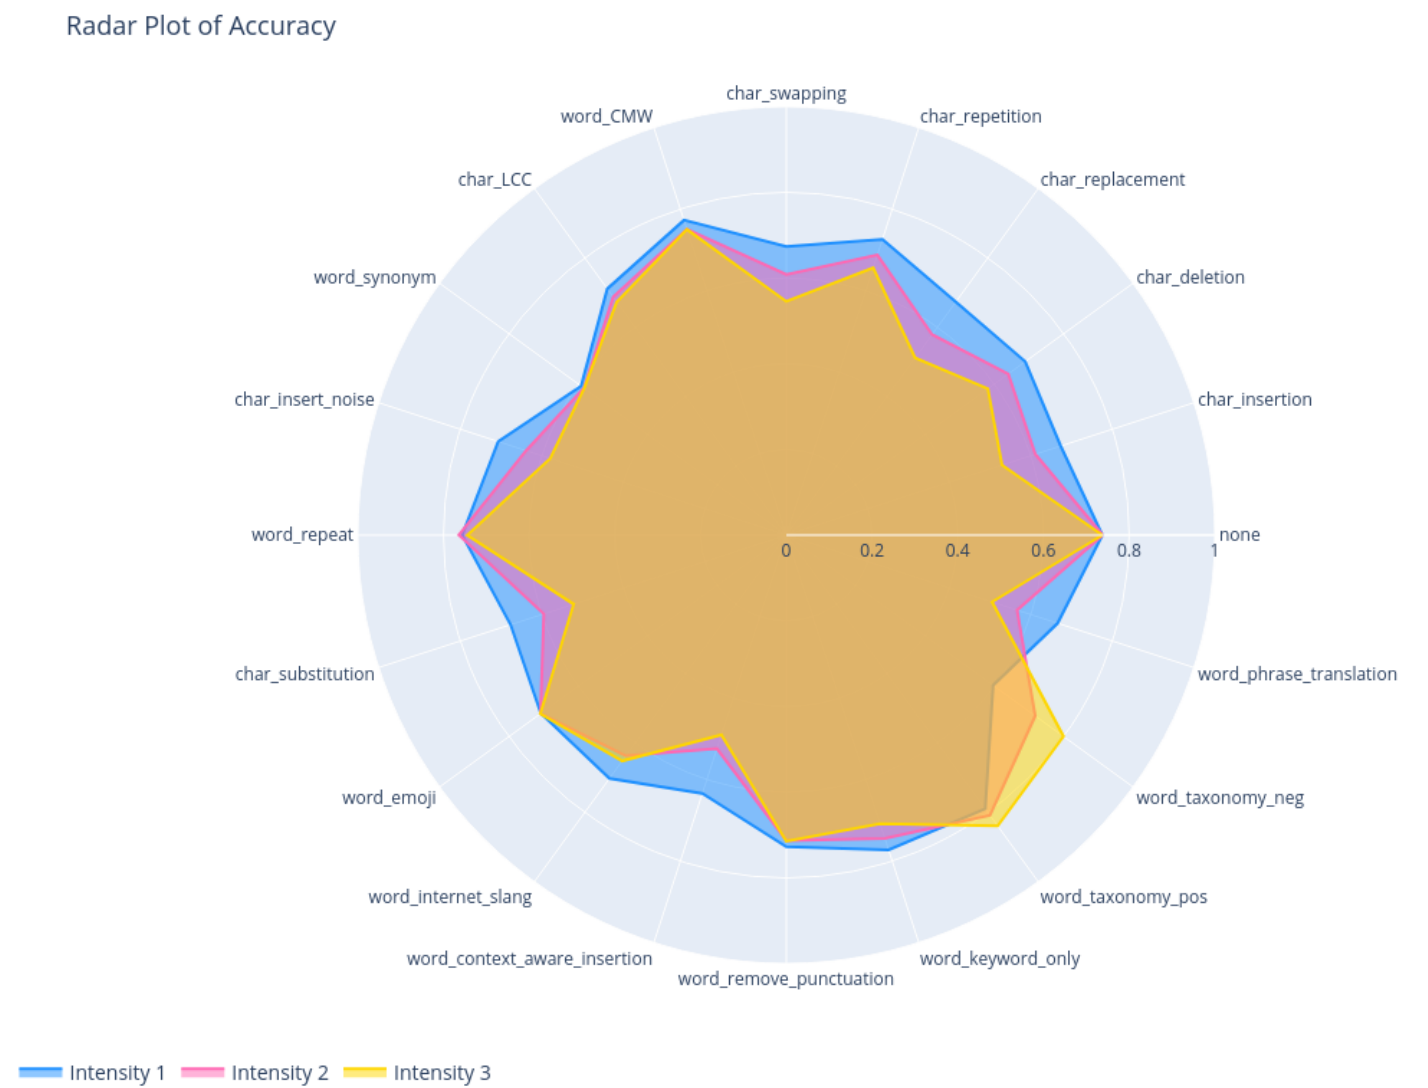

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 2 of Accuracy

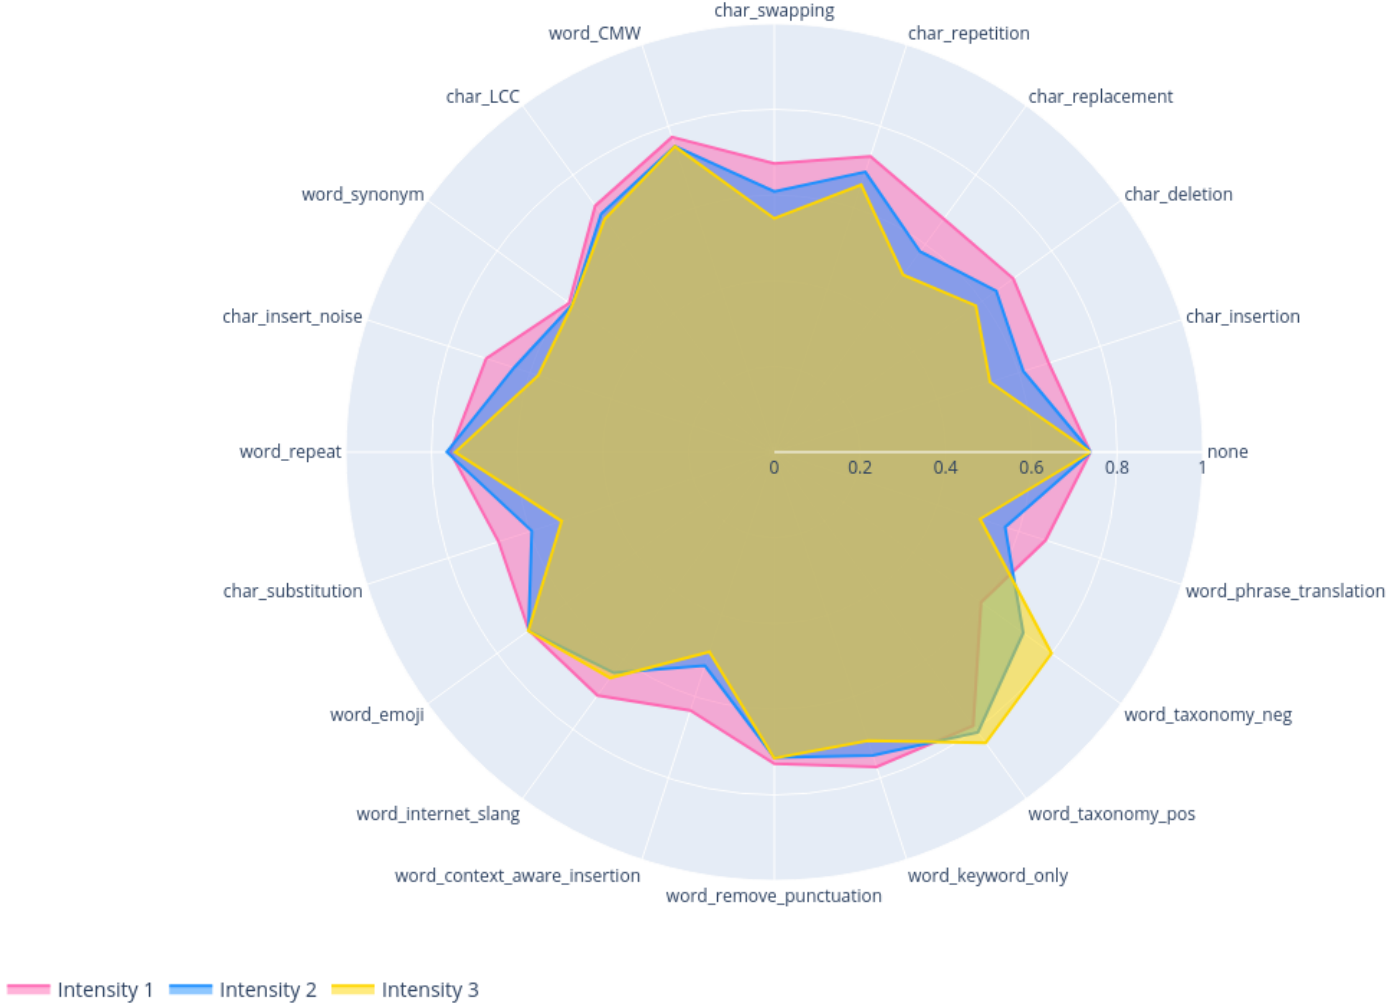

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 3 of Accuracy

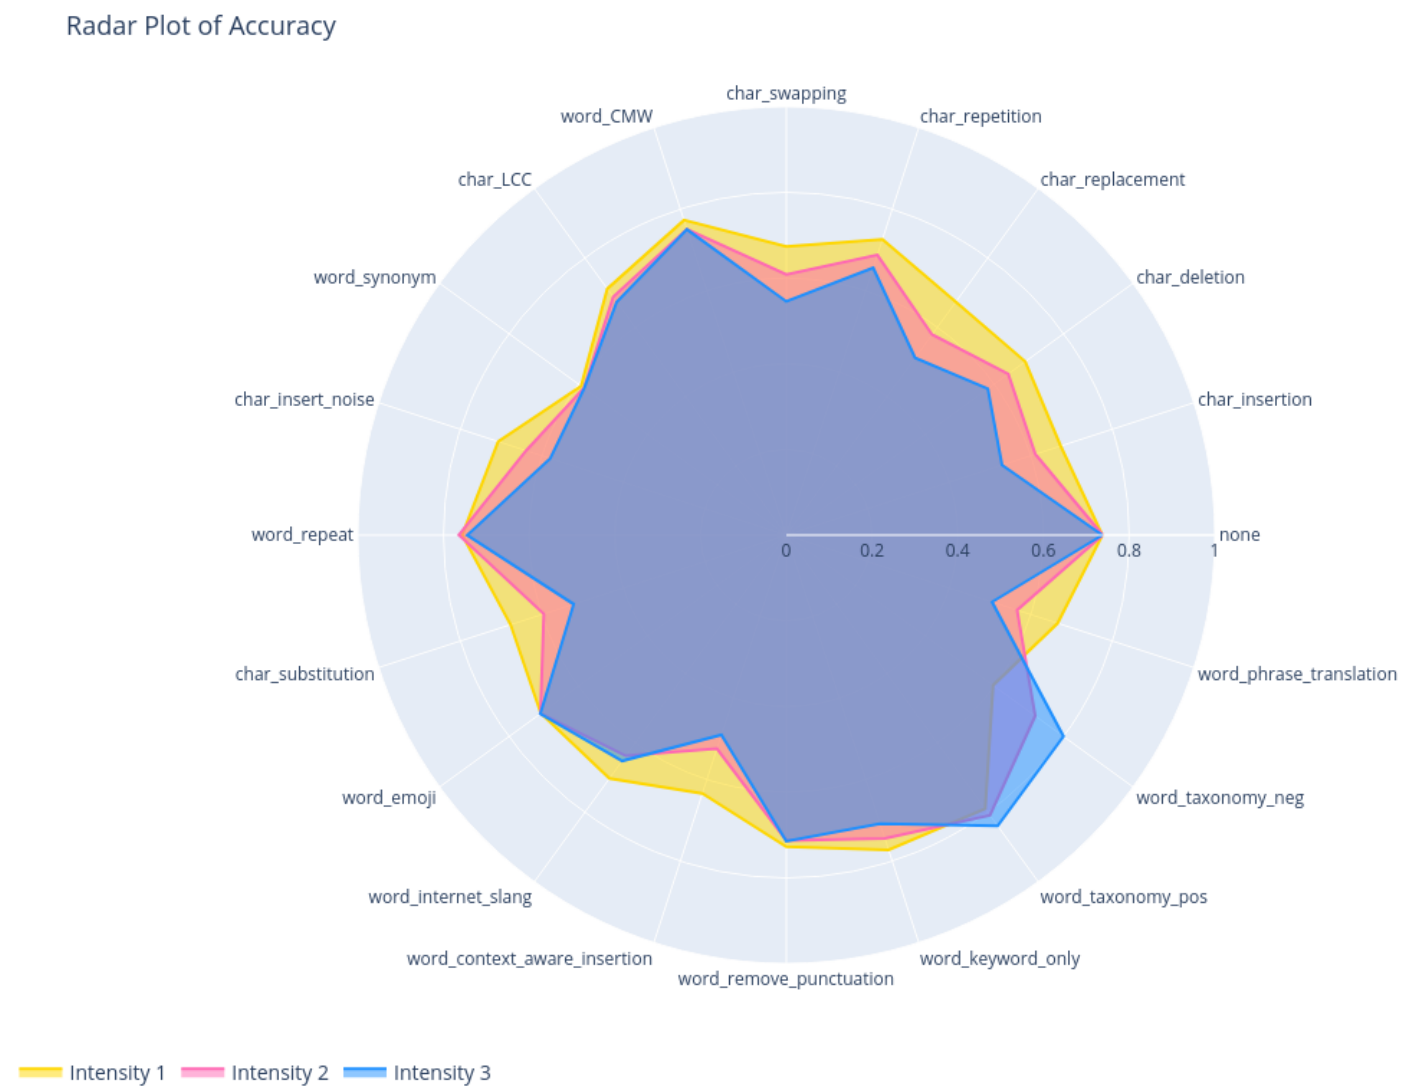

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

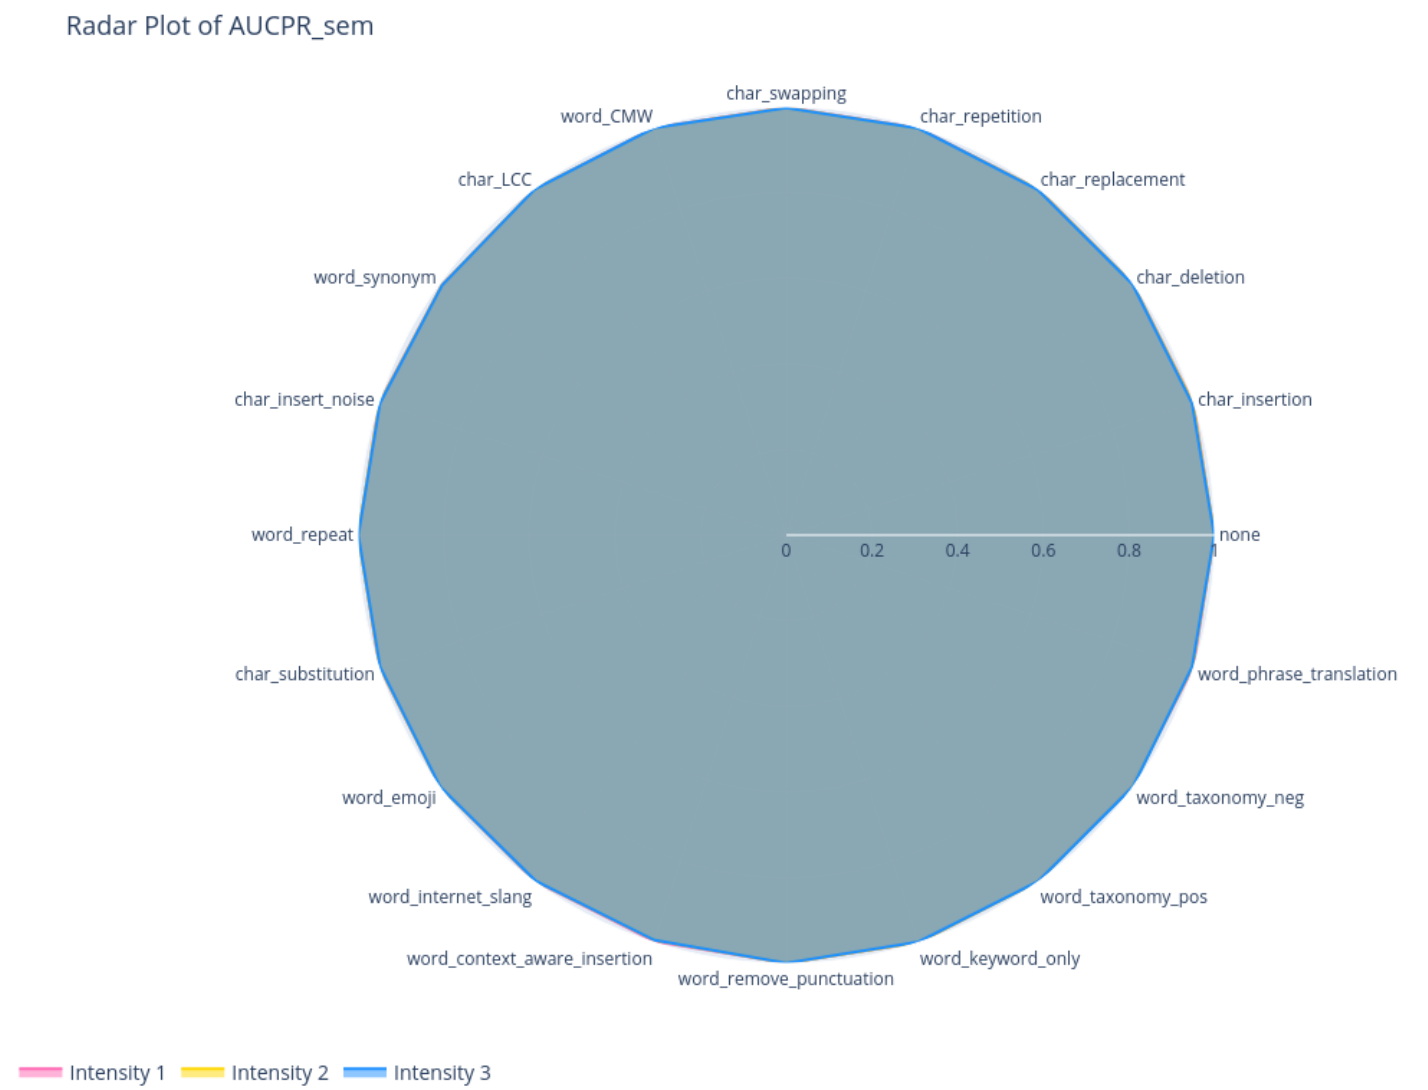

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 5 of Accuracy

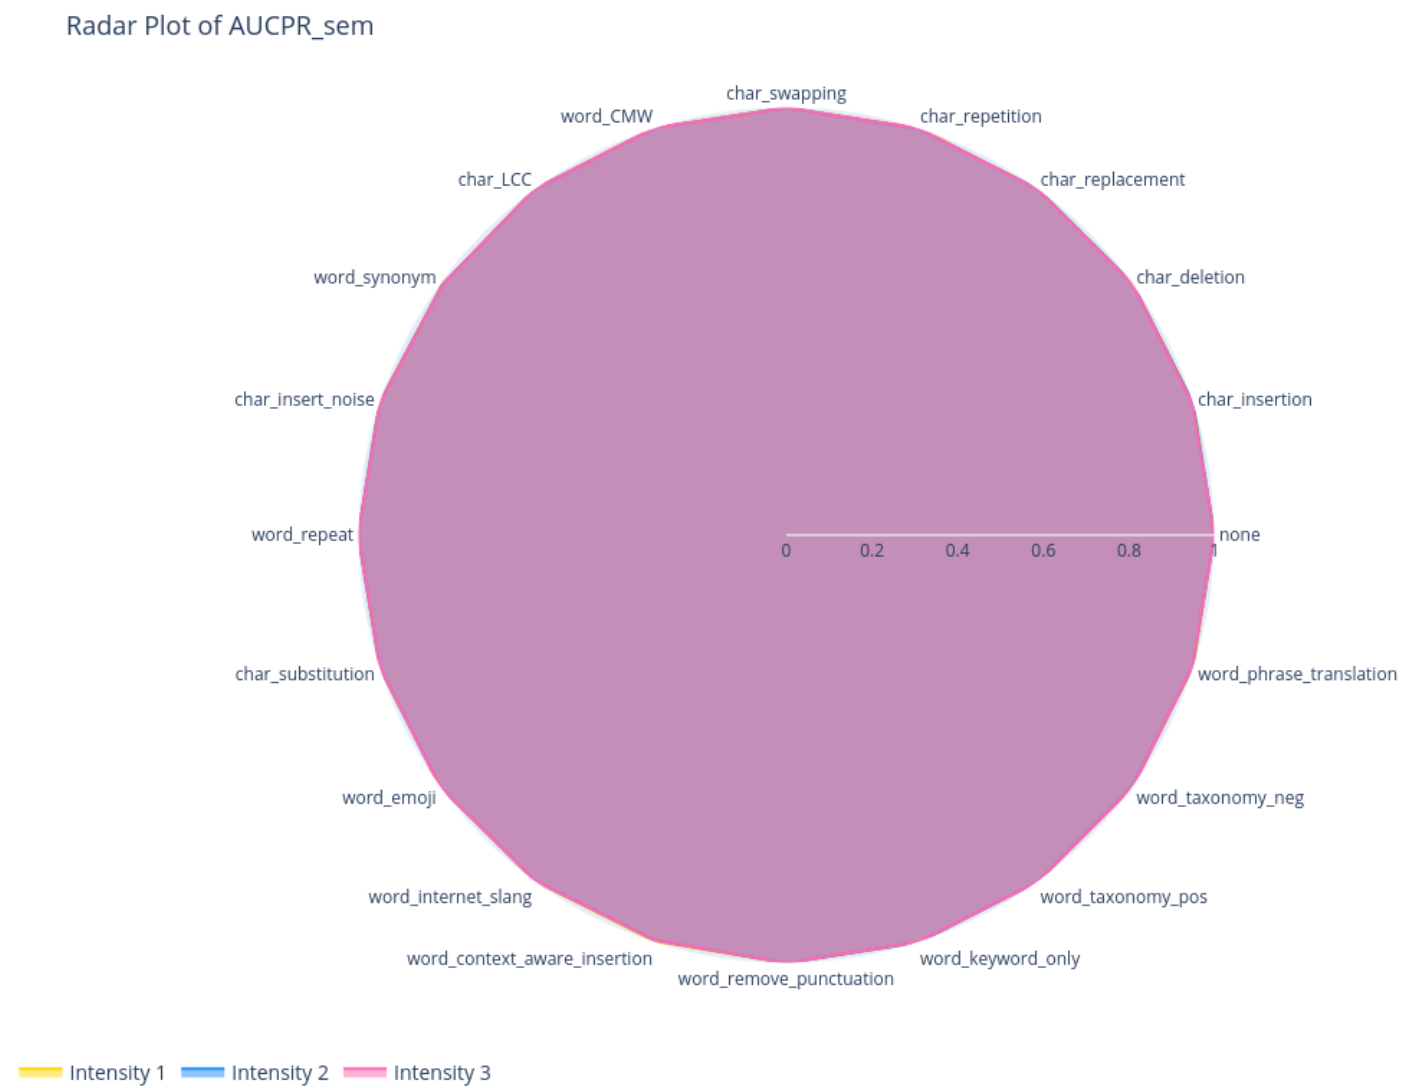

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 1 of AUCPR_sem

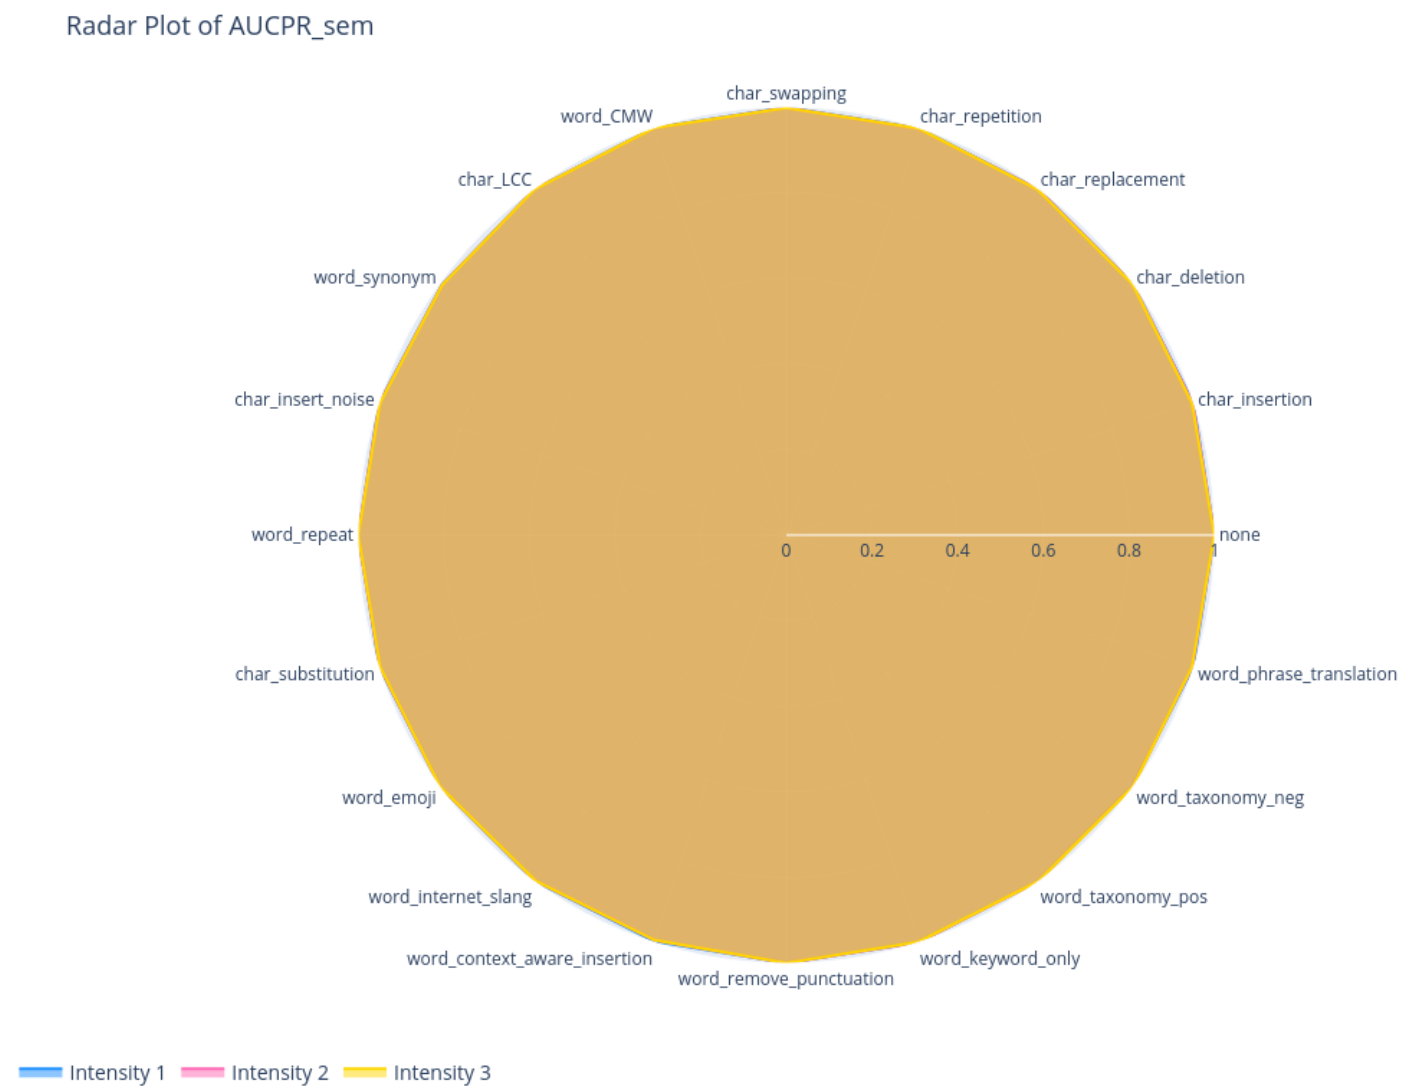

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 2 of AUCPR_sem

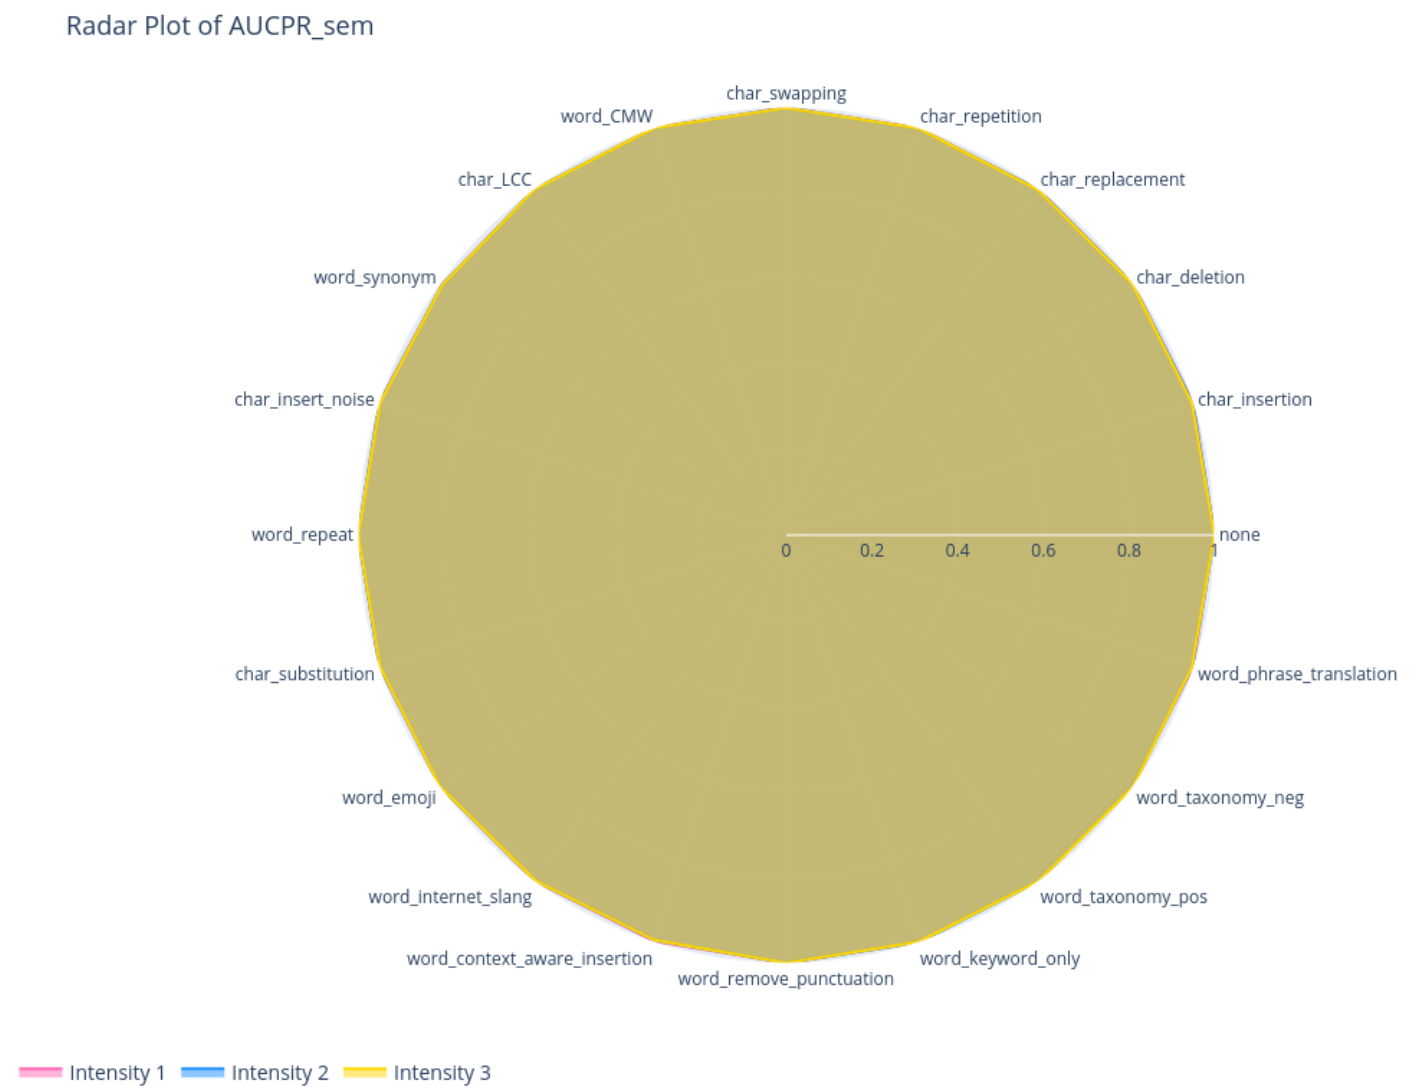

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 3 of AUCPR_sem

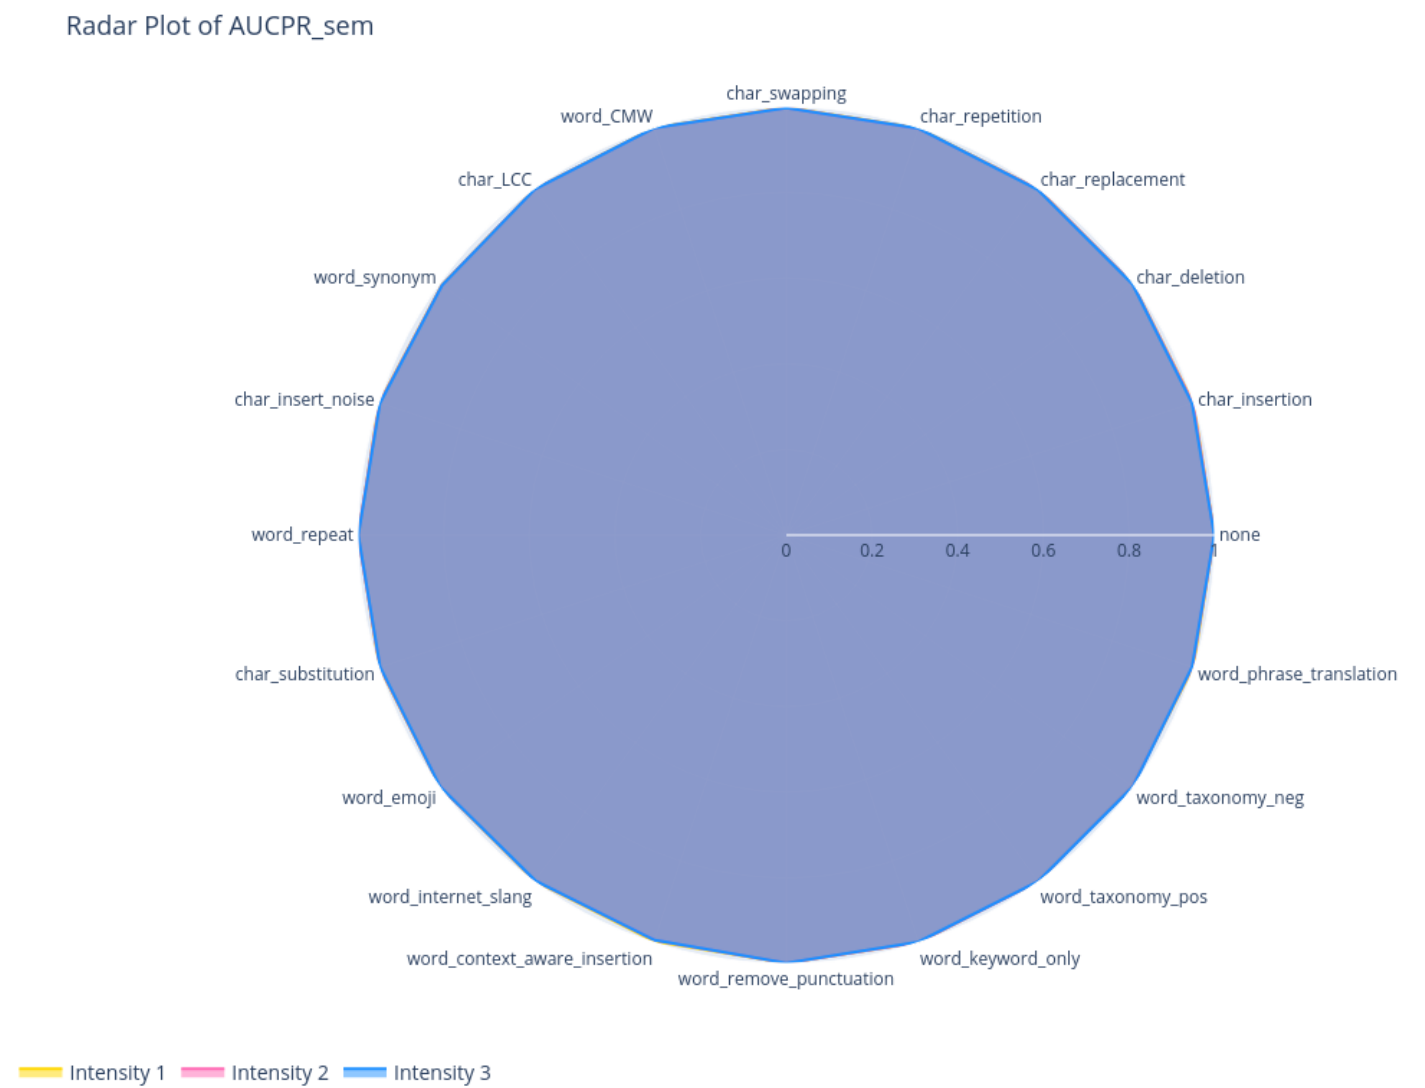

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 4 of AUCPR_sem

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 5 of AUCPR_sem

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.
