

Typo Effect Analysis

Model: Llama-3-8B

Strategy: Direct Completion

Max New Tokens: 25

Temperature: 0.1

Radar Plot 1 of Accuracy

Radar Plot of Accuracy (Viridis Color Scheme)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 2 of Accuracy

Radar Plot of Accuracy (Red Tones)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 3 of Accuracy

Radar Plot of Accuracy (Diverging Color Scheme)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 4 of Accuracy

Radar Plot of Accuracy (Pastel Colors, No Fill)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 5 of Accuracy

Radar Plot of Accuracy (Plasma Color Scheme, Only Fill)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 6 of Accuracy

Radar Plot of Accuracy (Cyclical Color Scheme with Transparency)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 7 of Accuracy

Radar Plot of Accuracy (Grayscale with Increasing Opacity)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 8 of Accuracy

Radar Plot of Accuracy (Burgyl Color Scheme with Varying Marker Sizes)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 1 of AUCPR_sem

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 2 of AUCPR_sem

Radar Plot of AUCPR_sem (Red Tones)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 3 of AUCPR_sem

Radar Plot of AUCPR_sem (Diverging Color Scheme)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 4 of AUCPR_sem

Radar Plot of AUCPR_sem (Pastel Colors, No Fill)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 5 of AUCPR_sem

Radar Plot of AUCPR_sem (Plasma Color Scheme, Only Fill)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 6 of AUCPR_sem

Radar Plot of AUCPR_sem (Cyclical Color Scheme with Transparency)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 7 of AUCPR_sem

Radar Plot of AUCPR_sem (Grayscale with Increasing Opacity)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Radar Plot 8 of AUCPR_sem

Radar Plot of AUCPR_sem (Burgyl Color Scheme with Varying Marker Sizes)

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.
