

Typo Effect Analysis

Model: Llama-3-8B

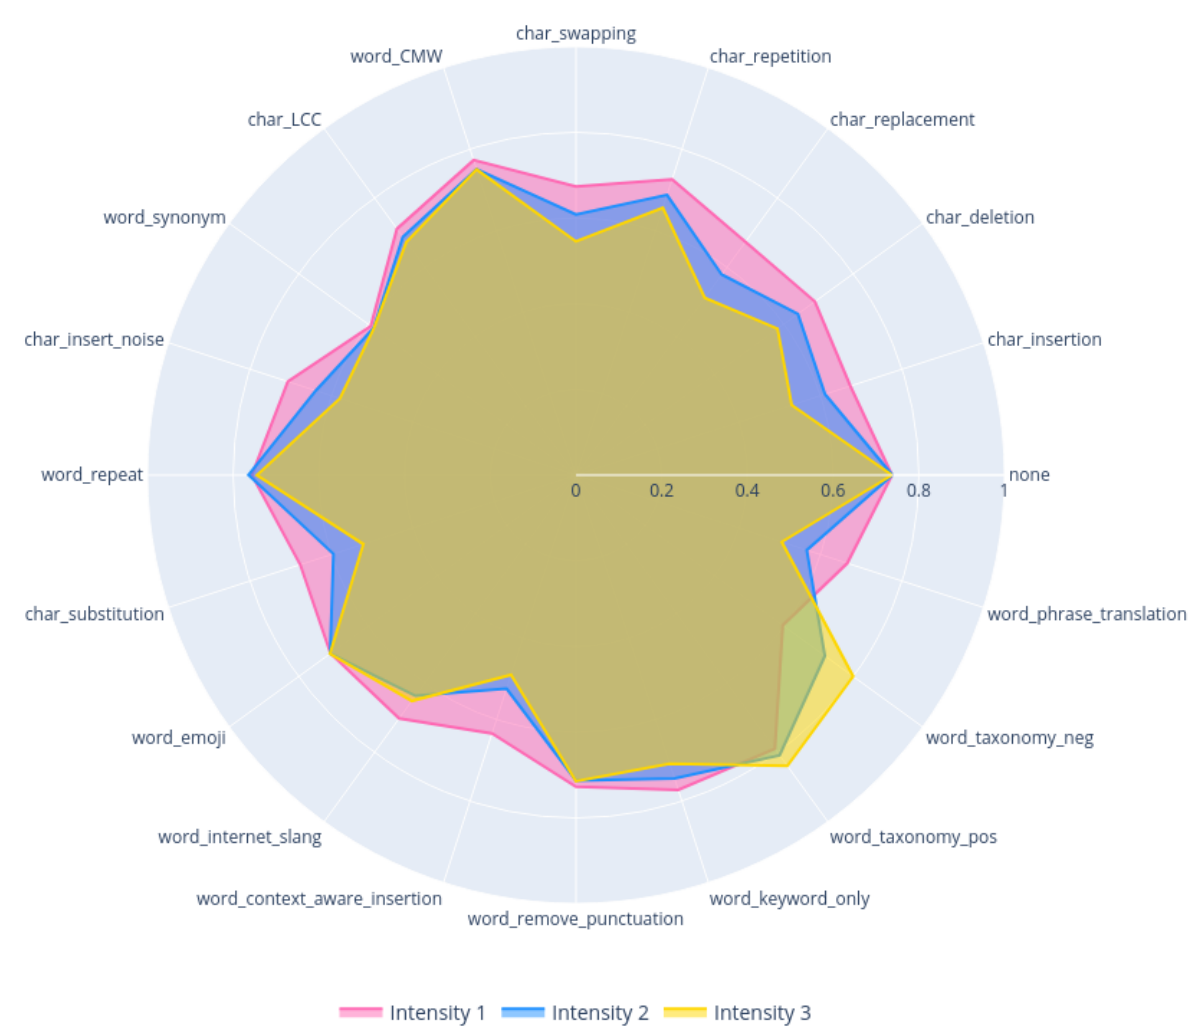

Strategy: Direct Completion

Max New Tokens: 25

Temperature: 0.1

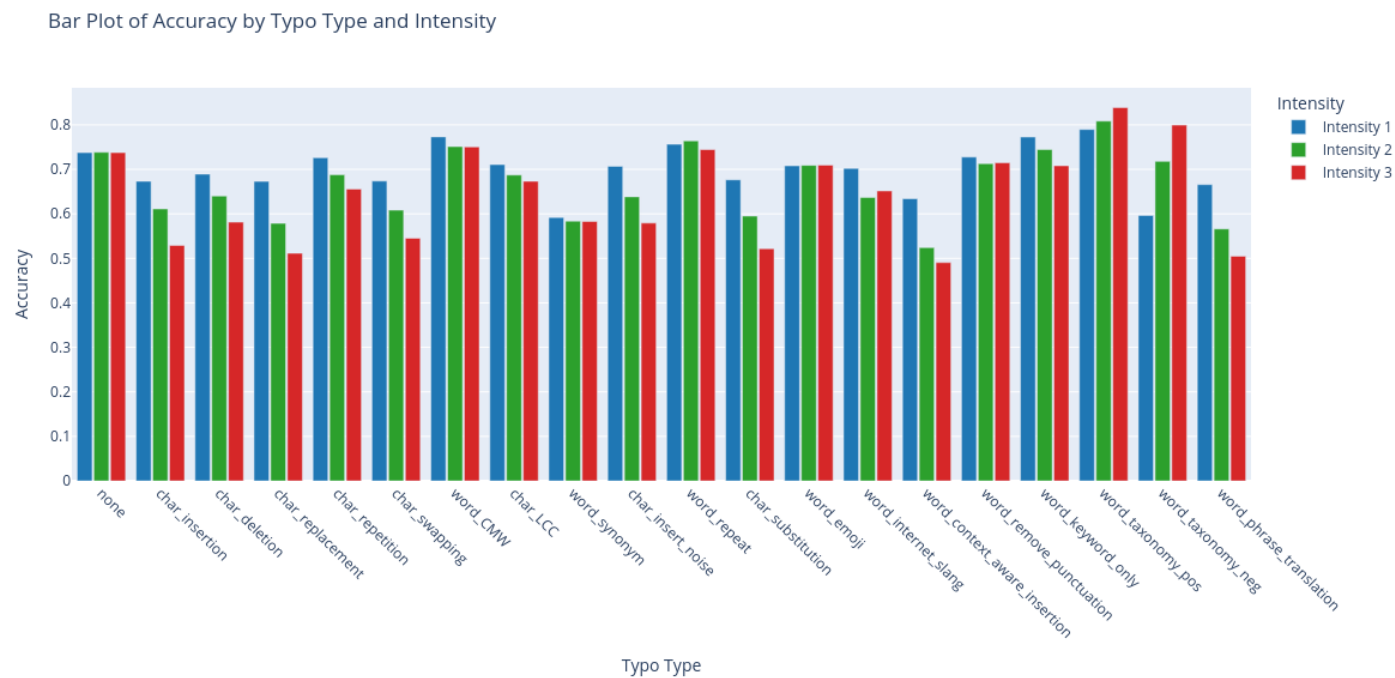

Radar Plot of Accuracy

Radar Plot of Accuracy

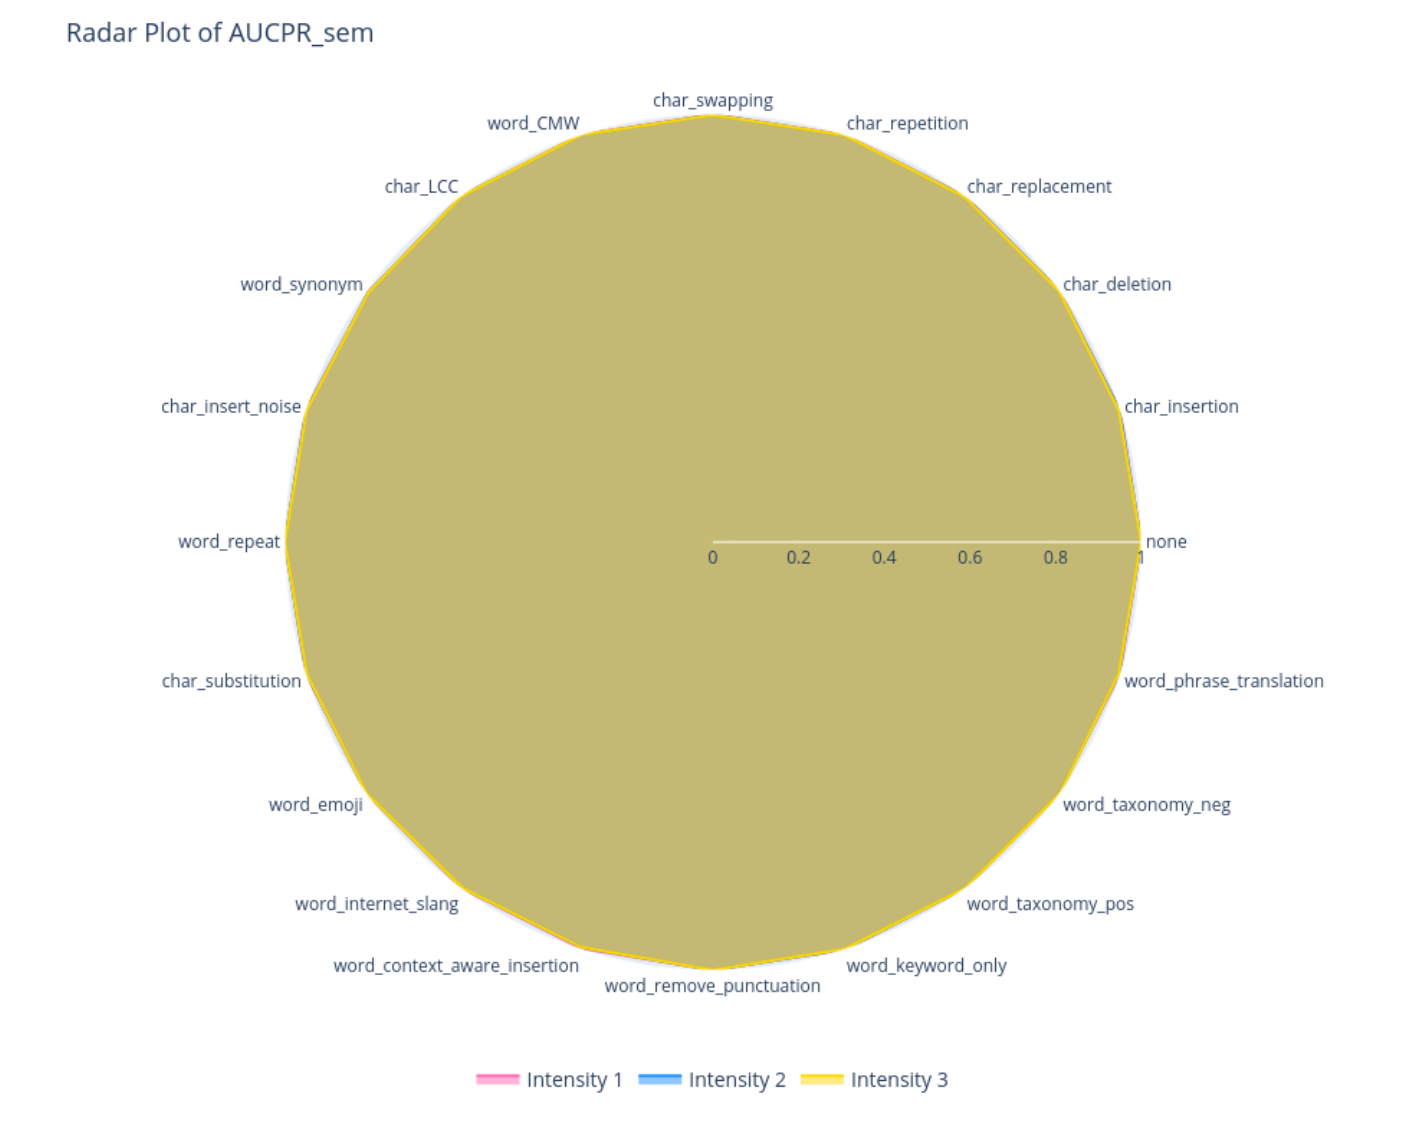

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Bar Plot of Accuracy

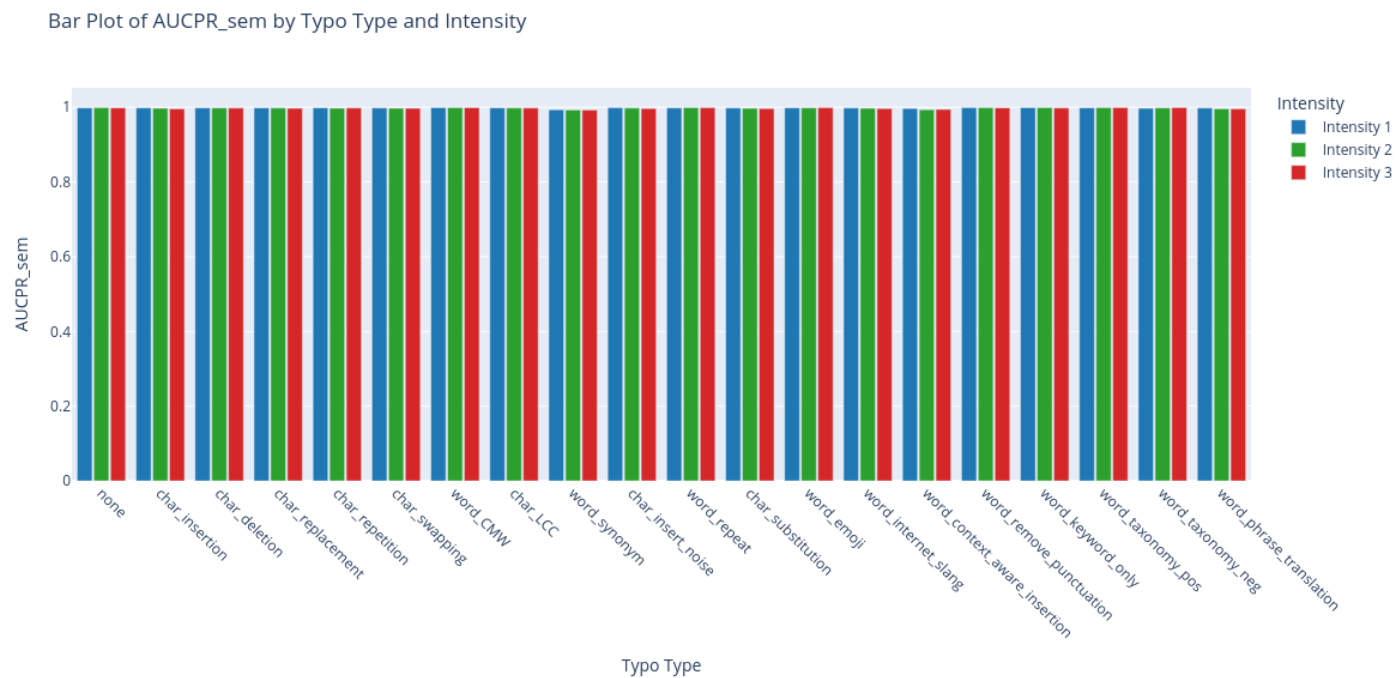

This bar plot shows the performance for each typo type and intensity. Each group represents a typo type, with three bars indicating the performance at different intensity levels (1, 2, and 3). This allows for a direct comparison of the effects of different typo types and intensities on the model's performance.

Radar Plot of AUCPR_sem

This radar plot illustrates the impact of different typo types and intensities on the model's performance. Each axis represents a typo type, while different intensities are shown as separate traces. The plot allows for easy comparison of performance across different typo types and intensities.

Bar Plot of AUCPR_sem

This bar plot shows the performance for each typo type and intensity. Each group represents a typo type, with three bars indicating the performance at different intensity levels (1, 2, and 3). This allows for a direct comparison of the effects of different typo types and intensities on the model's performance.
