

Plot 1: Perplexity by Quantization Method and Number of Bits

Perplexity by Quantization Method and Number of Bits

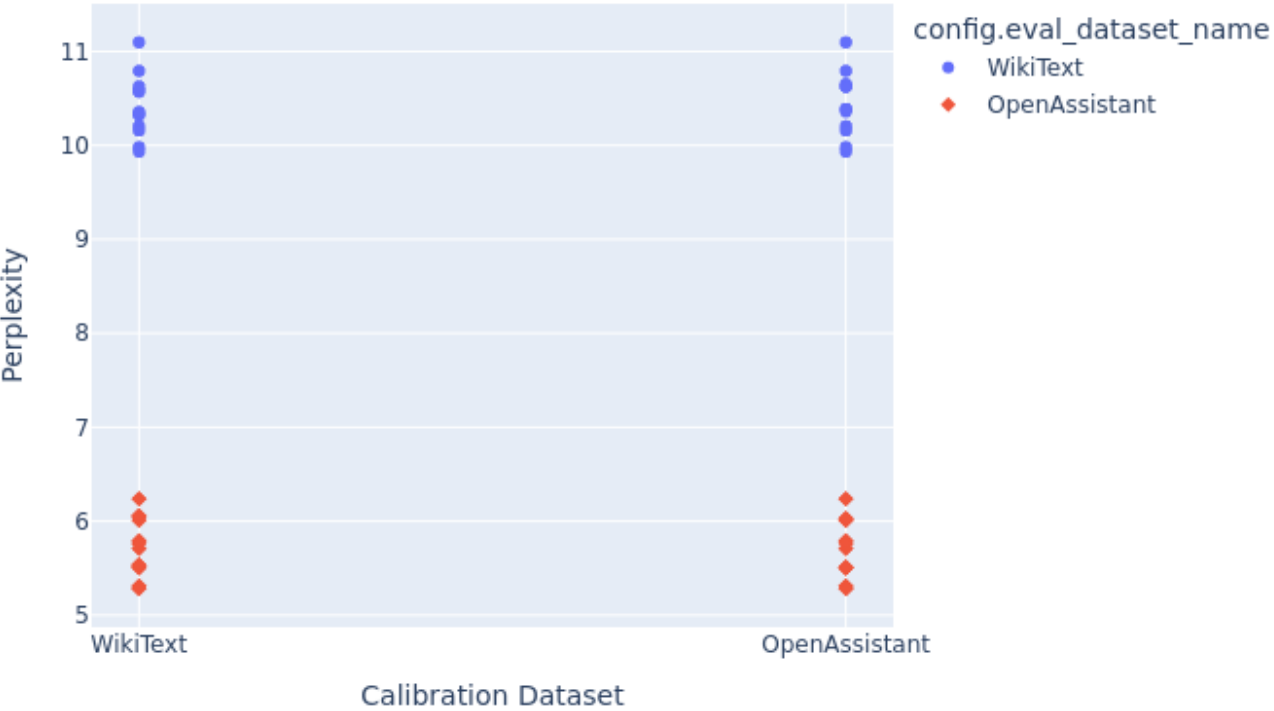

Plot 2: Brier Score by Quantization Method and Number of Bits

Brier Score by Quantization Method and Number of Bits

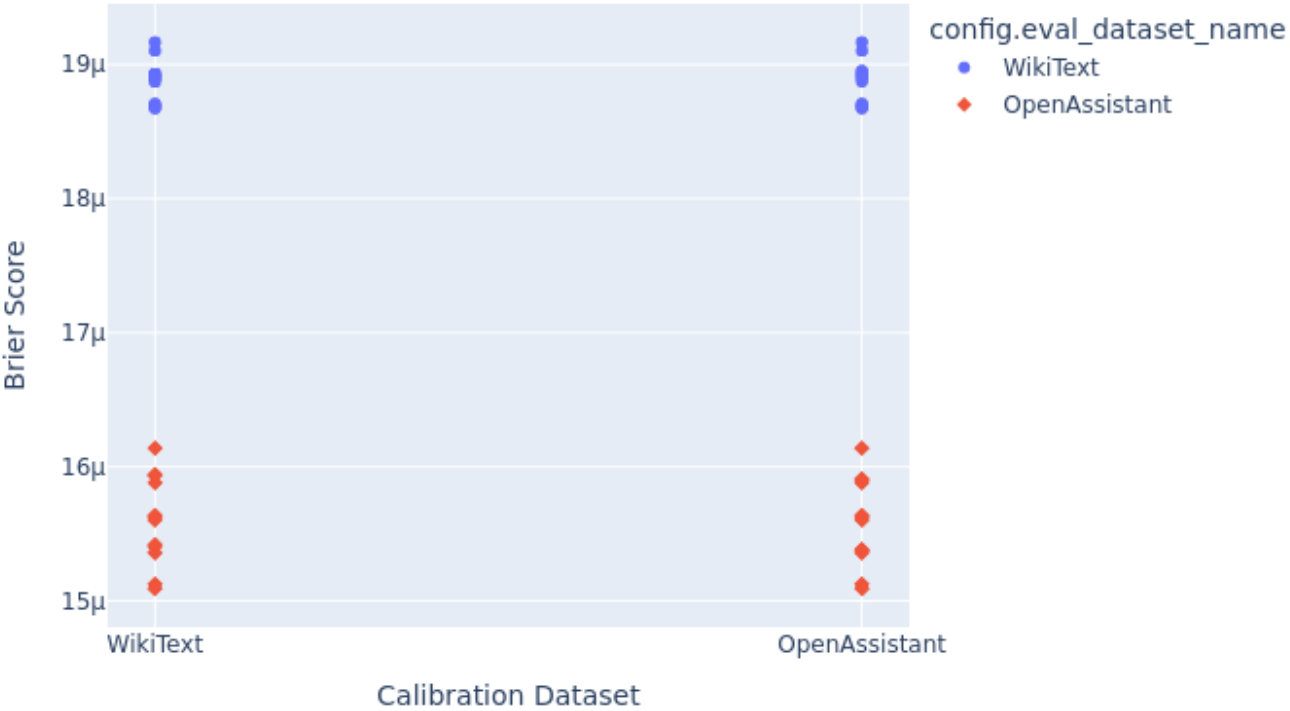

Plot 3: Perplexity by Calibration and Evaluation Dataset

Perplexity by Calibration and Evaluation Dataset

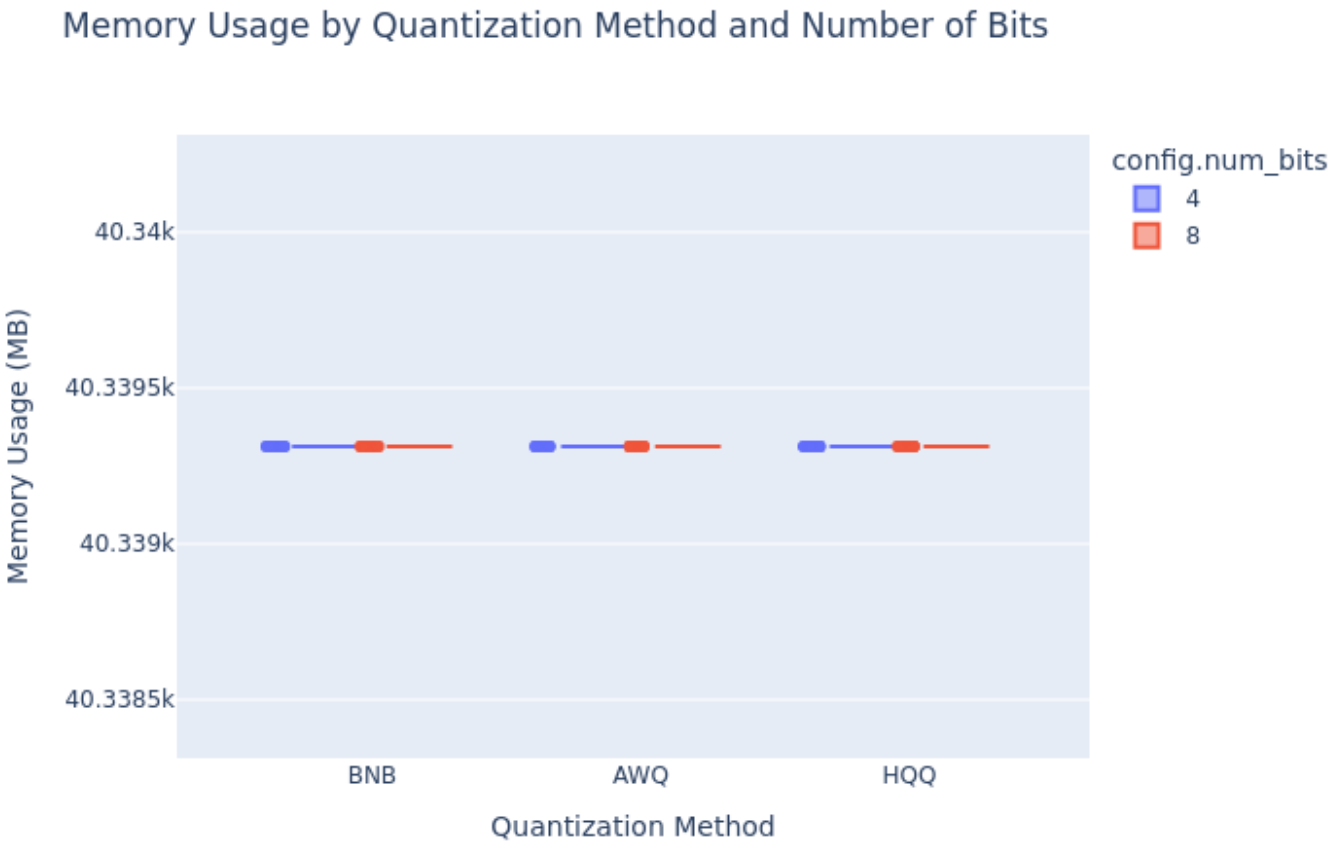

Plot 4: Brier Score by Calibration and Evaluation Dataset

Brier Score by Calibration and Evaluation Dataset

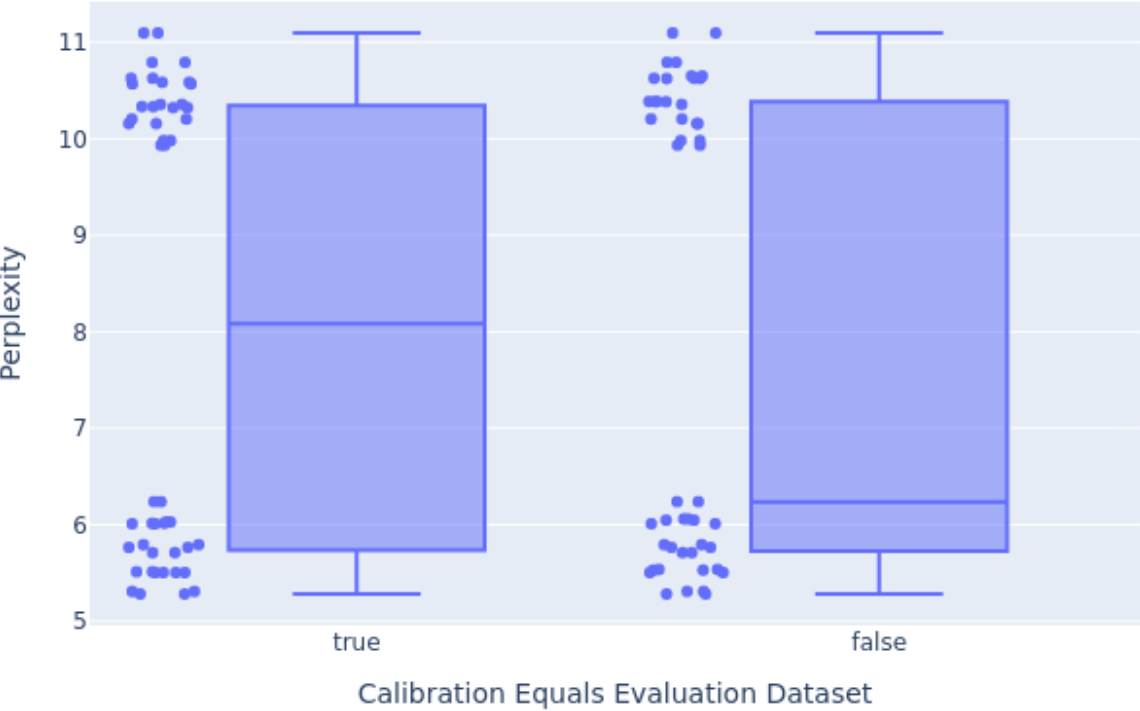

Plot 5: Memory Usage by Quantization Method and Number of Bits

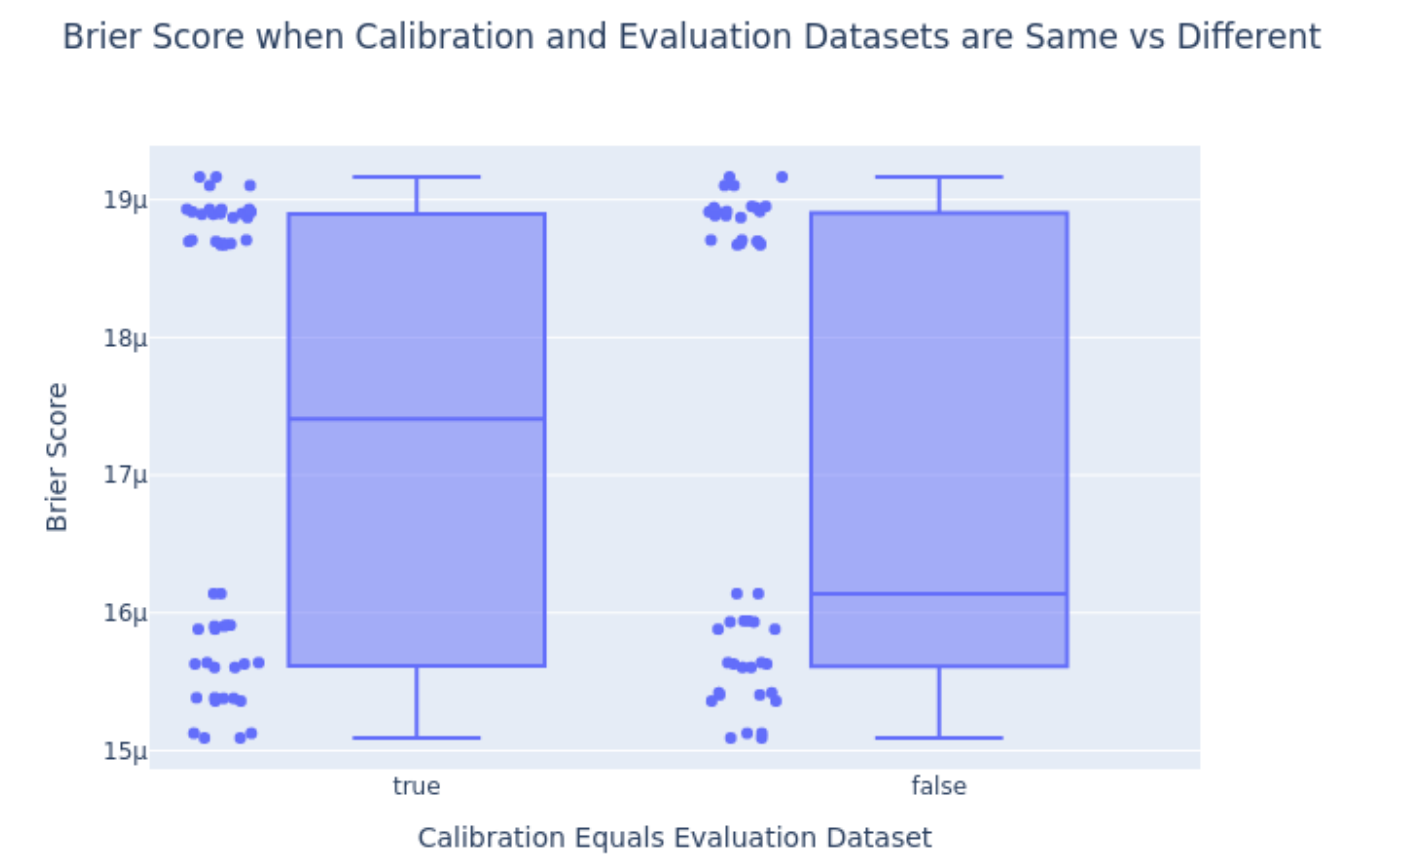

Plot 6: Perplexity when Calibration and Evaluation Datasets are Same vs Different

Perplexity when Calibration and Evaluation Datasets are Same vs Different

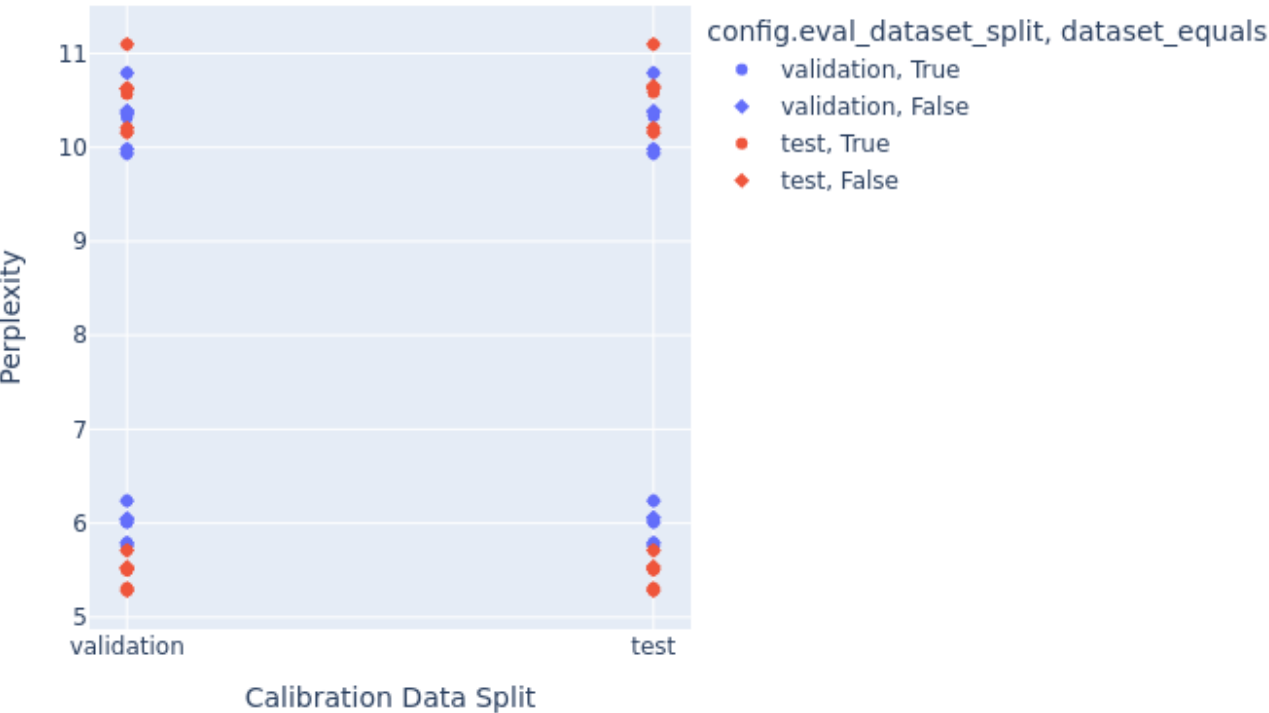

Plot 7: Brier Score when Calibration and Evaluation Datasets are Same vs Different

Plot 8: Perplexity by Calibration and Evaluation Data Split

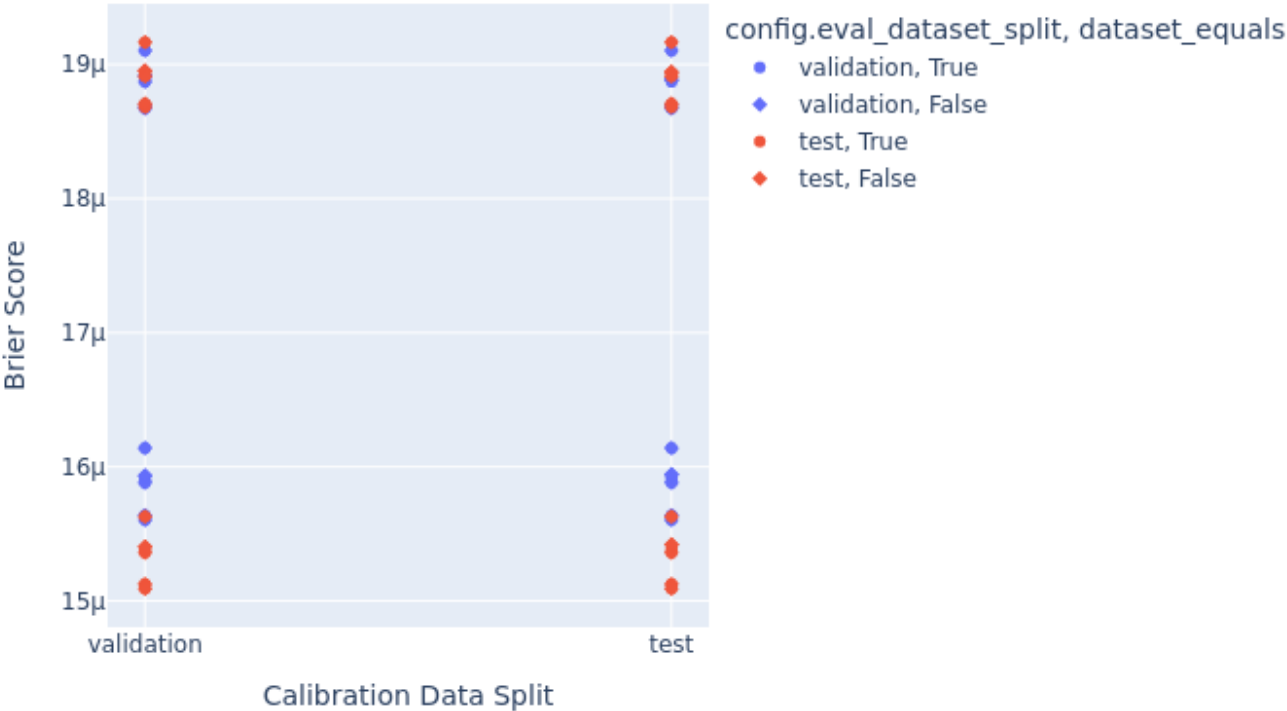

Perplexity by Calibration and Evaluation Data Split

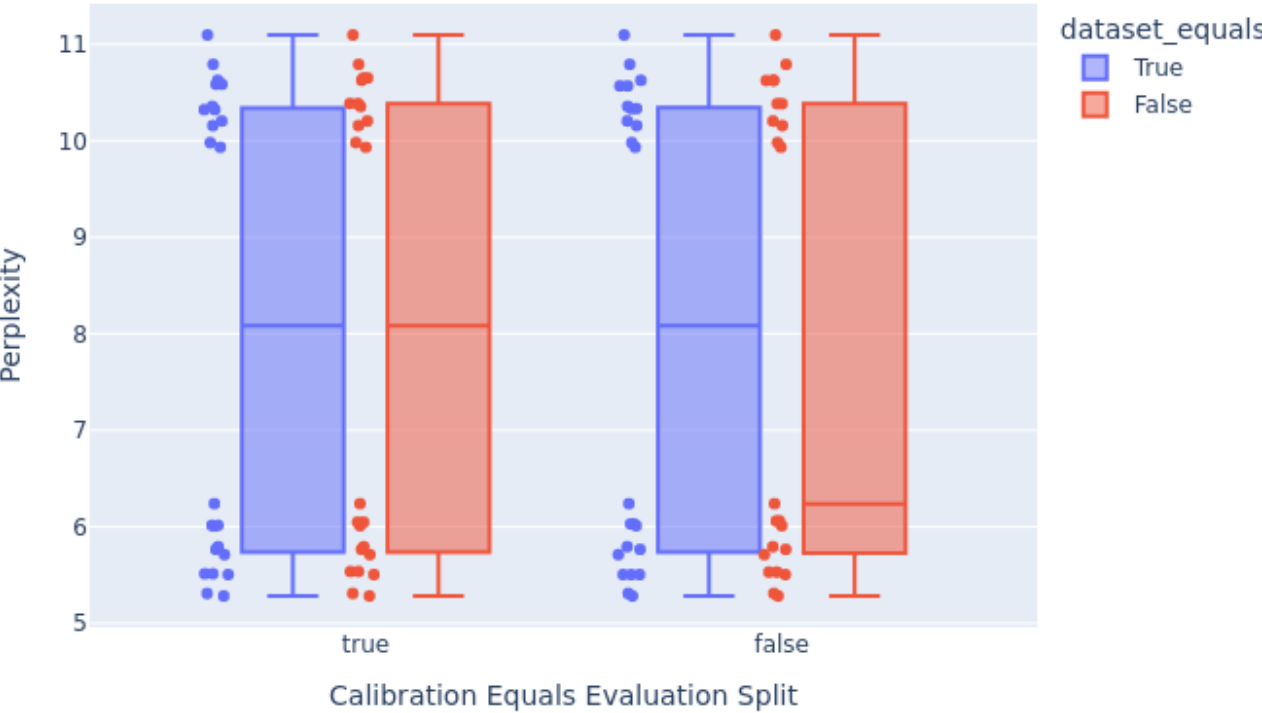

Plot 9: Brier Score by Calibration and Evaluation Data Split

Brier Score by Calibration and Evaluation Data Split

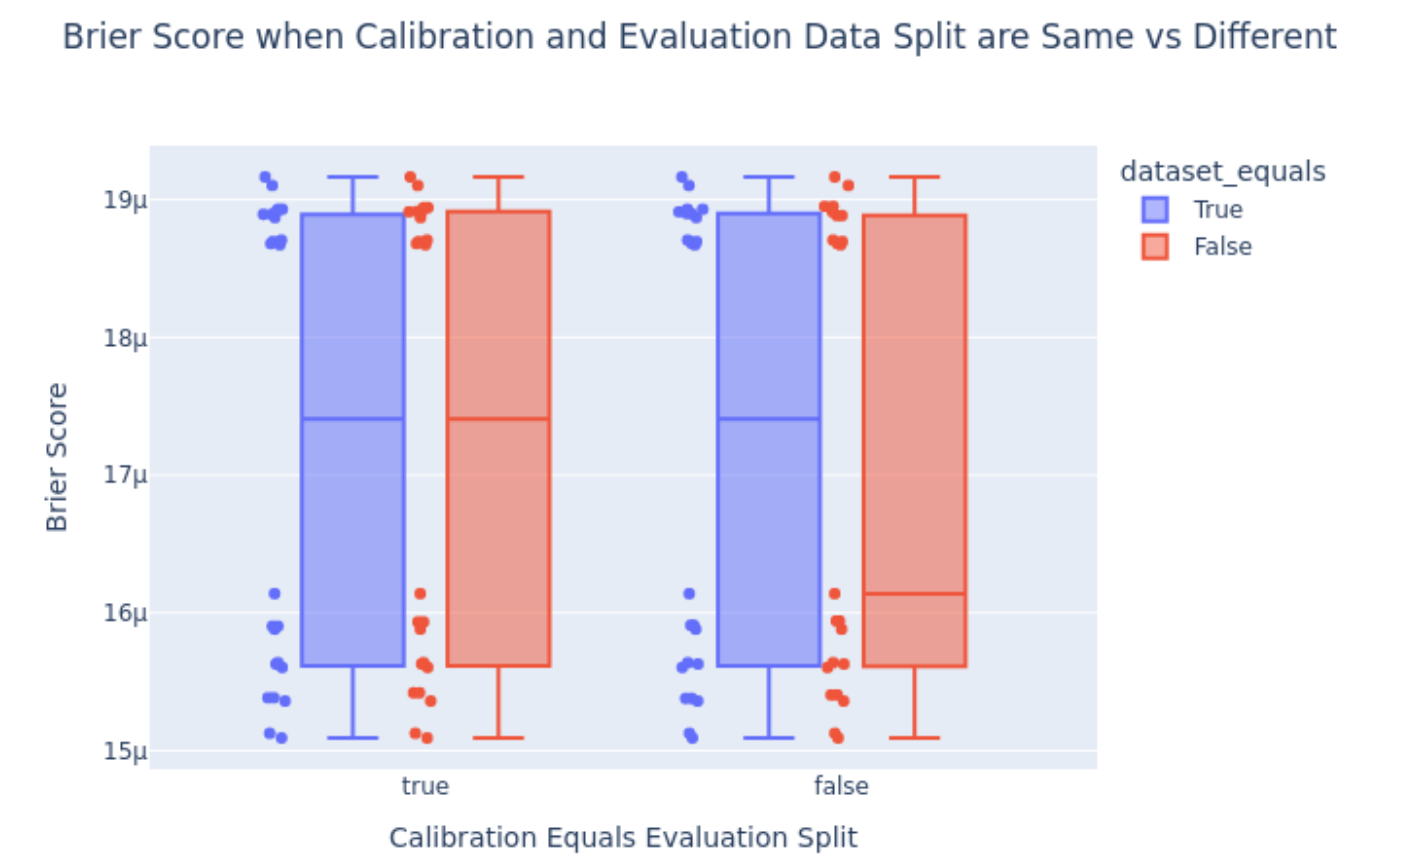

Plot 10: Perplexity when Calibration and Evaluation Data Split are Same vs Different

Perplexity when Calibration and Evaluation Data Split are Same vs Different

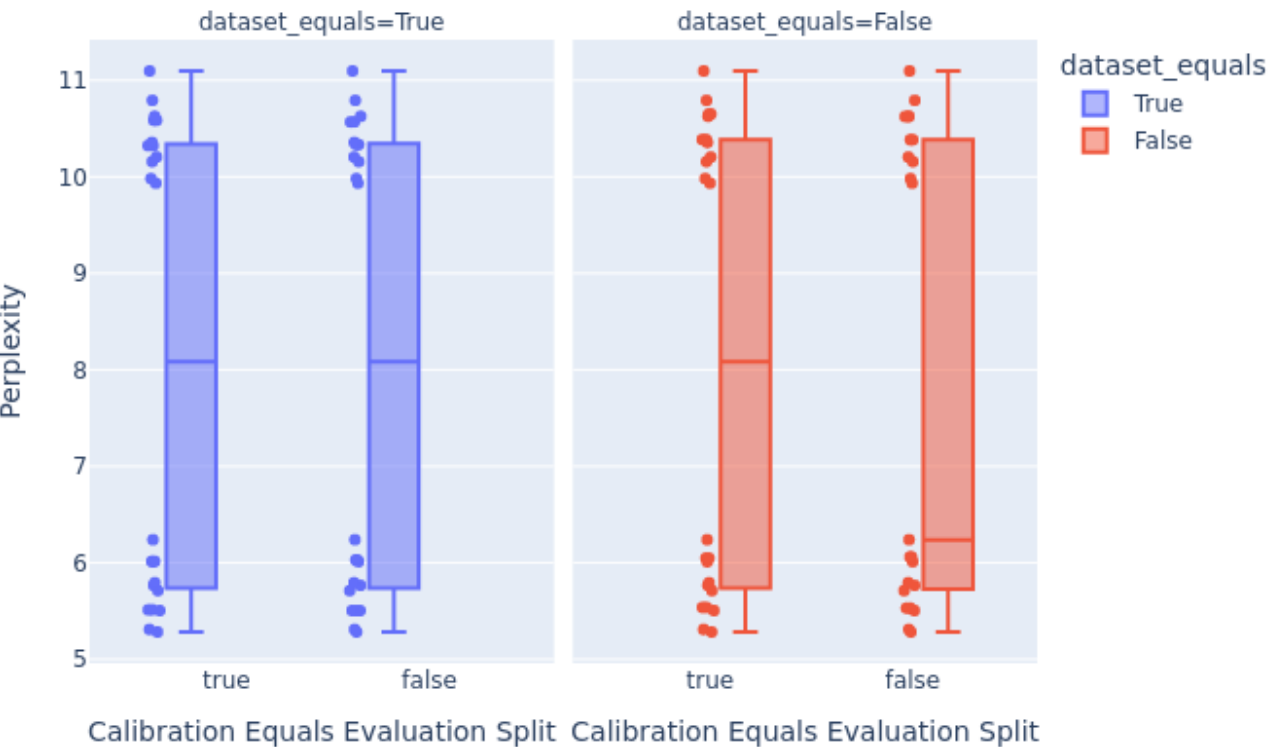

Plot 11: Brier Score when Calibration and Evaluation Data Split are Same vs Different

Plot 12: Perplexity by Data Split and Dataset Combination

Perplexity by Data Split and Dataset Combination

Plot 13: Brier Score by Data Split and Dataset Combination

Brier Score by Data Split and Dataset Combination
